

### 1.磁盘挂载

[https://blog.csdn.net/Chat\\_FJ/article/details/126154978](https://blog.csdn.net/Chat_FJ/article/details/126154978)

### 2.备份docker映射的目录ls

### 3.停止docker容器

```
systemctl stop docker systemctl stop docker.socket
```

### 4.磁盘映射到之前的docker映射的目录

```
mount /dev/vdb1 /data
```

### 5.重启docker

```
systemctl restart docker
```
